Summary

Data Scientist with expertise in predictive modeling, machine learning, and data-driven optimization. Experienced in designing and deploying AI solutions across diverse domains, with a focus on accuracy, robustness, and interpretability. Skilled in collaborating with cross-functional teams to transform complex datasets into actionable insights and drive data-informed decision-making.

Experience

Istituto Nazionale dei Tumori , Data Scientist	Milano, IT
- Working on multiple data science and machine learning projects in the healthcare domain, including the EU-funded I3LUNG project on predictive modeling for immunotherapy response. - Designed and implemented predictive models (traditional ML and neural networks) for large-scale clinical datasets (2,000+ patients), focusing on accuracy, robustness, and interpretability. - Developed fusion models for multimodal data, integrating clinical, radiological, and pathological information, with support for missing modalities to enhance predictive performance. - Streamlined data preprocessing and curation pipelines to ensure high-quality, consistent inputs for machine learning workflows. - Presented results to cross-functional teams and international stakeholders at annual project meetings. - Visiting Researcher at RWTH Aachen University (Aachen, Germany), March 2026, developing digital twin to simulate and model disease trajectories in NSCLC patients.	June 2024 – present 2 years
Politecnico di Milano , Data Scientist, Fellowship Researcher	Milano, IT
Collaborating on the I3LUNG project, in continuity with the role at Istituto Nazionale dei Tumori.	June 2023 – May 2025 2 years
ML cube , Data Engineer	Milan, IT
- Designed and deployed a distributed electronic data capture platform supporting secure, remote access to clinical data. - Built automated tools for processing, analyzing, and reporting clinical datasets, improving efficiency and data quality. - Developed backend services and APIs to streamline data management and integration with research systems. - Collaborated with clinicians and AI researchers to align technical development with medical research goals.	July 2022 – May 2023 11 months

Publications

APOLLO11: a bio-data-driven model for clinical and translational research in lung cancer A Prelaj, L Provenzano, V Miskovic, et al.	2026
I3LUNG: Clinical Validation of a Multimodal AI Tool to Support Immunotherapy Decisions in NSCLC A Prelaj, V Miskovic, M Sacco, A Ferrarin, et al.	2026
Multimodal generative AI jointly learns pathology and clinical data to synthesize a multinational lung cancer cohort HM Hieromnimon, V Miskovic, M Sacco, A Ferrarin, et al.	2025

Aiding data retrieval in clinical trials with large language models: The APOLLO 11 Consortium in advanced lung cancer patients F Corso, L Mazzeo, V Peppoloni, et al.	2025
Multimodal AI using host, tumor, and ghost biomarker for predicting immunotherapy efficacy in NSCLC V Miskovic, M Brambilla, L Mazzeo, R Ferrara, C Silvestri, A Ferrarin, et al.	2025
AI multimodal tool highlights host and ghost biomarkers for guiding immunotherapy decisions in clinical practice V Miskovic, L Mazzeo, R Ferrara, M Brambilla, C Silvestri, A Ferrarin, et al.	2025
AI-based prediction of long-term survival in NSCLC patients treated with immunotherapy V Miskovic, L Mazzeo, C Silvestri, A Ferrarin, et al.	2025
Integrating radiomics and real-world data to predict immune-checkpoint inhibitors efficacy in advanced Non-Small Cell Lung Cancer L Provenzano, M Favali, L Mazzeo, et al.	2024
Open Problem: Leveraging Reinforcement Learning to Enhance Decision-Making in Oncology Treatments A Zec, A Prejal, A Ferrarin, et al.	2024
MetaLung: Towards a secure architecture for lung cancer patient care on the metaverse M Zanitti, M Ferens, A Ferrarin, et al.	2023

Education

MS	Politecnico di Milano , Computer Science and Engineering - Graduated with a score of 105/110 - Focus on machine learning, data science, and AI model development.	Sept 2020 – May 2023
BS	Politecnico di Milano , Computer Engineering Graduated with a score of 87/110	Sept 2016 – Sept 2020

Skills

Languages: Python, Java, C, SQL, TypeScript

AI/ML Frameworks: scikit-learn, TensorFlow

Data Processing: Pandas, NumPy, SQL

Deployment & DevOps: Docker, AWS, GitHub Actions

API & Web Development: FastAPI, Angular, PostgreSQL

LLMs & Generative AI: Experience integrating and fine-tuning large language models via APIs, LoRA, prompt engineering, and LangChain for LLM-powered applications

Experiment Tracking: Neptune.ai

Collaboration & Version Control: Git, GitHub, experienced in working in cross-disciplinary teams
